

Job Title: Python Software Developer

Location: Ahmedabad, Gujarat

Experience Required: 0-2 Years

Job Summary:

We are looking for a motivated Python Software Developer to join our growing technology team. The candidate will be responsible for developing, testing, and maintaining scalable software applications. The ideal applicant should have strong programming logic, database handling knowledge, and problem-solving skills.

Key Responsibilities:

- Develop and maintain Python-based applications
- Write clean, reusable, and efficient code
- Work with SQL databases and perform complex queries
- Integrate REST APIs and third-party services
- Debug and resolve software defects
- Collaborate with QA and development teams
- Participate in code reviews and technical documentation

Required Skills:

- Strong knowledge of Python programming
- Good understanding of SQL and relational databases
- Familiarity with APIs and JSON
- Knowledge of Git/GitHub
- Basic understanding of object-oriented programming
- Logical problem-solving ability
- Good communication skills

Preferred Skills:

- Familiarity with Flask or FastAPI
- Knowledge of cloud platforms is a plus
- Understanding of software development lifecycle

Education:

Bachelor's degree in Computer Science, Information Technology, or related field.
