

Company Overview:

Online PSB Loans is a digital credit infrastructure company focused on automating and digitizing lending for both borrowers and lenders. It aims to solve challenges in credit distribution for MSMEs and retail borrowers. The company is expanding its digital footprint and diversifying into various industry segments.

Website: <https://www.oplinnovate.com>

Location: Ahmedabad (On-site, full-time)

Position: Data Scientist

Responsibilities:

- Design, develop, and deploy models for computer vision tasks such as object detection, image classification, OCR, segmentation, etc.
- Build and fine-tune LLM-based pipelines for tasks such as information extraction, document summarization, chat-based interfaces, and automated reasoning.
- Work closely with cross-functional teams (engineering, product, business) to translate business problems into data science solutions.
- Conduct exploratory data analysis, statistical modelling, and feature engineering across diverse data sources.
- Evaluate model performance using appropriate metrics and iterate for improvement.
- Stay up to date with the latest research and advancements in AI/ML, computer vision, and NLP.

Qualifications:

- Bachelor's or master's degree in computer science, Data Science, Engineering, or related fields.
- Hands-on experience in Data Science or Machine Learning roles.
- Strong proficiency in Python and ML libraries such as scikit-learn, pandas, PyTorch/TensorFlow, OpenCV, Langchain etc.
- Experience with Computer Vision frameworks (e.g., YOLO, Detectron2, MM Detection) and LLMs (e.g., Hugging Face Transformers, Lang Chain, LLaMA, GPT).
- Experience with real-world model deployment and evaluation.
- Strong grasp of machine learning concepts, statistical analysis, and data manipulation.
- Excellent problem-solving, communication, and stakeholder collaboration skills.

Good to have:

- Exposure to the lending, finance, or banking domain (e.g., credit scoring, income estimation, fraud detection).
- Experience with document AI or multi-modal AI systems.
- Familiarity with cloud platforms (AWS/GCP/Azure) and MLOps tools.
- Experience working with OCR engines (Tesseract, PaddleOCR, etc.) and integrating CV+LLM pipelines.
- Understanding of RAG pipelines, fine-tuning of open-source LLMs, or prompt engineering.
